Reference for DEPS

Over the course of this year DEPS have been carrying out stainless steel work at our cheese manufacturing site in Paraparaumu.

These jobs have ranged from simple pipe work alterations to some design and build type work.

Due to the nature of our products and processes, this work has to be carried out in tight time frames and there is a reasonable amount of pressure on time that goes with these projects.

To date DEPS has managed to complete all of this work in a timely fashion to meet the short time frames that we have available. Given the short time frames, their work is neat, tidy and finished to professional dairy standards.

I am happy to recommend DEPS to other companies and commend them for their excellent service and project management to date.

Anyone is free to contact the undersigned.

A handwritten signature in blue ink, appearing to read "Corrie den Haring", is written over a horizontal line.
